"Go up, thou bald head." Imagine salf in the situation-venerable skull th merry crowds of flies skating over it sunlight making a great relypoly moon f it, and the breezes blowing a sense of akedness across its vast exposure—the with abominably glorious hair. Even it ently, you would have felt an itching all ver your shiny pate to scalp them. What to come bobbing about an old bald head criptural youths did, ridiculing you and naking you angrier at the uncovered pos ture of your intellect than you were of

your own accord-why, then let loose the

bears! The bears in the case performed

a sacred duty No one but feels bald-headedness to be imposition. No one acquiesces in the unroofing of his phrenological edifice The process by which a man is defrauded of his equitable share of the hair allotted to the universal pinnacle of mankind is felt to be a bare swindle. When the ocess is perceived to be beginning, the man resents it, and bristles up about it, and defends against it to the last pinfeather. He won't have it. He puts the with their washings, and and shampooings, and shingshavings. He hire tonsorialist to rub the imout of his scalp. He precipitates himself upon the dragstore and buys more than a million consecutive washes-wash after wash-that have been patented and certified (sworn affidavits in the newspapers, with name and residence) to grow hair on a healthy billiard-ball

But all in vain. Day by day he sees his shining piece of his mind as big as a trade-dollar takes the place of the cowlick aker." on his crown. It gradually spreads forward over his moral faculties, and finally meets his westward-ho forehead on th 180th meridian. At last it is day all over his upper hemisphere. To change the figure, his noble and commanding dome of thought stands out in all the innocent askedness of its unadorned architecture.

How many a man has this capital affliction-in fact, this d-dome of the capital affliction-betallen! Old men naturally more than old women, the reader is not advised, and is not to be advised at present. But it is a noticeable and very remarkable fact that old age generally takes from man his suit of hair, while it leaves woman hirsute. How common is the baid-headed old man, and how rare the bald old woman? Some of this difference may be due to the shocking audacity with which the old gent naturally thrusts his bare pate into society and the charming propriety with which the old lady artificially conceals hers from the vulgar gaze. But it is not all due to that, by any means. We all know, of our own intimacy with old people, that there are a hundred masculine bald heads among them to one feminine. The why this is thus is a question further along.

But the bald head is not-if it ever was, it is no longer-confined to old age A bald-headed young woman, it is true, is an astonisher; but the bald-headed young man is all the go. He may not like the fashion, yet be is fashionable. The fre quent skinny skulls of young gentlemen bobbing round in genteel society are no ticeable-or, rather, so frequent as not to be noticeable. In fact, a young man's bald head has almost ceased to be a mark of distinction. It has almost ceased to be regarded as one of the symptoms of a

gigantic mind, as it used to be. It was once supposed that only young brains that were on the bulge-fiery brains that burned up the youthful hair-were subject to baldness. Great Casar was bald. The first Napoleon had thin hair. Shakspeare is represented with a forehead higher than his head. Assemblages of distinguished men, courts, congresses, senates, were observed to display an extraordinary number of bare patches and open barrens on their lofty summits. Hence, where there was little or no hair on top of a young or middle-aged man,

But now it is not so much so. nowadays young fellows who are scarcely out of their teens, and some little to lose but hair, shed with the prodigality of genius. The num ber of really innocent but entirely respectable young men who are at this moment seadding round under bare polls is too be any longer surprising.

bald-headedness is a sign of a certain kind of culture. It is a city fashion. The oung rural roosters do not take to it much. The great, grand shocks of hair that still crown the farmers' sons are a sight to see. If you want to take cogni ance of the demands which our civiliza tion makes upon the hair, you must go into the stores and offices of our town

And thus you are led to inquire into the causes of the masculine bald head. Why is it that there are so very many more bald-pated old men than ditto old women? Some say that men do more thinking and think their hair off. This won't do at all; for where the woman has intellect enough, as she often has, to be the head of the family she still has the hair of the head of the family

Others maintain that it is because men rear unventilated hats and women don't. There is probably something in this; but, it were sufficient, then it would explain why the old farmers, who wear their hats all the time except when they eat and sleep, are not more generally bald-and they are not-than the old merchants and the old lawvers, who rarely have their hats on. The in-door, unhatted people of the stores and offices, as has been remarked

are the baldest part of our population while their wives and daughters have as good hair, on the average, as the women What, then, is the reason that men-old or young-so far outstrip women in bald headedness? There are two reasons-

there is a third, which is too physiological to discuss here—that seem to us to ac-But any adequate discussion of the two seems would extend this article to undue proportions; and therefore we must necessarily defer it to another issue of th SUNDAY GLOBE-REPUBLIC. Look for the

Graham Deuwell, Esq., is a respectable and influential colored lawver of this city Mr. Deuwell is also a politician of some prominence. He was one of the alternate delegates from this congressional district

to the last Republican national convention Mr. Deuwell was therefore expected to have opinions as to a Republican can didacy for the governorship of Ohio. On the 28th of December, 1884, the GLOBE-REPUBLIC, after a full consultation with Mr. Deuwell at his office, published his opinion, as follows:

Deuwell in Globe-Republic, Dec. 28, 1884. "There is an objection to Foraker among the colored people, and it is probably mor extensive and more deeply rooted than is gen erally suspected. It has all grown out of his ivil-rights suit and others of like characte which were made so prominent in the campaign . Foraker neither said nor did anything in the case but what any dutilawyer would have said and done But it is a fact that, with all the explana tions made, the prejudice against Foraker re another man would be preferred, as we want a candidate against whom nothing of this glory fade. The hairs of his head are kind can be brought, whether true or not; ainst Foraker to be faire. I prefer as a candidate, first, J. Warren Keiter; sec ondly, John Beatty, and thirdly, J. B. For-

"I do not believe there is any disaffection any considerable extent; I believe Judge For aker is a triend to the colored race. For governor my choice lies among the tollowing Ohio statesmen: Judge Foraker General R. P. Kennedy. Of course. General R. P. Kennedy. Of course right here in Springfield, where Rev. Gazawas lived, there are a tew colored men opposed to Foraker, but I think it is only thos vere directly interested in the case.

It is my firm belief that no trace of disaffection to Judge Foraker can be toun mong the great body of colored people in

The Democratic members of the legis ature are represented to be nearly a uni n opposition to the submission of a pro hibitory amendment. Governor Hoadly's essage will strengthen them in that faith. It will take three Republican votes in the house to submit a license amendment These may be found in Stryker and Peet, of Hamilton, Ryan of Scioto, and Haley of Cuyahoga. A license amendment may be got before the voters of Ohio, after all but, if it is, it will share the fate of its predecessors at the hands of the small iquor-men and the prohibitionists.

The "Tichborne claimant," who wa proved to be a fraud by being proved to be one Arthur Orton, and put in the pententiary for it, but who still stoutly main ains that he is the veritable Roger Tich orne, will be pleased to learn that he is not Arthur Orton, at least; for Edmund Orton comes forward now with the news by telegraph from San Francisco, that he has found and identified his brother Ar thur Orton in an insane-asylum at Sidney New South Wales. Score one for the Tichborne claimant.

Felix Duryos, a celebrated French cook has died leaving \$50,000 to two nephews on condition that they have a famous recipe of his engraved on his tombstone with his epitaph. It is not stated what the recipe is for; but, if it will tell the average hotel hashist how to put chopped beef and potatoes and onions together so as to make the mess taste as it used to when a boy's mother brought it on to the breakfast table of a cold winter morning, it ought to be put on the granite in letters an inch deep

The hope that Gov. Oglesby may have the opportunity to appoint Senator Logan to be his own successor will not be re alized. The appointment can not be made unless the legislature adjourns without electing; and, as each legislator oets \$5 a day as long as he stays, there are enough members who can not make the half of that at home to keep the thing tied the year round. If Logan gets there at all, he will have to have a Democratic vote, which they say he will never get.

Phelan when he lay backed to pieces on the sidewalk in front of O'Dynamite Rossa's office was asked if he wanted a minister or priest. "No," said he, "I don't want anybody. I don't believe any religion. I am a follower of Bob Ingersoll." If Col. Bob had been there, be night have felt proud of his followerand then again he mightn't. Bob is at alleged gospeler of peace and good-will No kaifing or dynamiting in Robert's heavenly scheme of the universe. This man Phelan is a bad disciple.

The council of Keokuk, Iowa, adopted resolution Monday night declaring the prohibitory liquor-law a failure, and aserting that moral sussion, with a rigid icense law, is the only remedy. They ask for a special session of the legislature o repeal the law. This is plain news, without an opinion.

The high and serene way in which lofty ditors instruct the public from informa ion furnished by some rollicking exchange of no pretensions shows how dignified stupidity gets the credit of wisdom.

Mr. Connery, obituary editor of th Y. journal Truth, declares that "Truth rushed to earth shall rise again" in new morning penny paper, which he is going to start next month.

This sage remark is found in a New fork journal of great dignity: "Terror caused by earthquakes is said to be more appalling than any one who has not felt i can realize." So!

The Mind Reader.

"Madam Blank, Mind Reader," that is the way a poorly written shingle-sign read as i held congenial company with other signs-Furnished Rooms to Let," etc., on a some what dilapidated house in Springfield-no ma ter where, and rattled in the wind that roared along the unfrequented street not long ince-no matter when. The GLORK REPUB LIC man had never had his inner conscious ess clearly diagnosticated by an outside party, hence he must be excused for a natura uriosity to have the thing which makes his daily bread (in connection with his legs) duly brought torth and exposed in the highest style of the art.

The night was Jark; the heavens were afflicted with spasmodic attempts at rain, and the wind cavorted along the strets and played high-jinks with the rattling signs, the tripping awnin, s and the still more dripping heds that spilled their accumulations of heaven's dew upon the wayfarer like ordinary buckets of water dropped from open win-

dows, and was just as wet. The house was finally reached, and rigorous pul. at a rusty knob with creaking inside wire attachments, sends a bell, some where in the bowels of the building, into violent and gyratic bysterics. Finally the door slowly opens, our business inquired after with great precaution, which we answer satisfactorily in a stage whisper, and are admitted. We pass along a dark hall-way following the pit-a-pat of footsteps of what we suspicion to be a female torm, until finaliv we enter a room lighted only by a shaded lamp. The shade of the lamp is ornamented with a range pictures that cast their weird shadows on the wall and ceiling, and every soutter of the lamp-wick made the borrio figures dance like very spooks making a night

At this igneture a centleman enters and be fairly rubs his hands with delight at seeing us. He draws us right into conversation, city School Board. The little gentleman excuses himself finally, and promises to produce the remainder of the entertainment in short order. A torm, enveloped in black from head to foot, enters bearing a lighted tallow candle; it sits down as we are about to rise or be risen; it speaks Young man, you have lost a fortune by the cruel and despisable act of one of my sexyour grandmother. Hear what I foretell for you; eggs will advance and the huckstering usiness, if you are patient and industrious will enable you to regain what you have lost." Now, how did she find that out? was what we asked ourselves as we returned homeward on that eventful night. We also wonder it that fellow whom we guyed with several little armless illusions didn't go and give the thing away, and we are atraid be did. We had lost the money, though, by not betting that Ohio would go for Blaine.

No New Years' Calls.

The time-bonored and pleasing custom of New Year's calls is fast dying out, if not aiready dead, in Springfield as well as elsewhere, and many reasons may be assigned for the final wearing away of this once very popular American manner of celebrating the first day of the new year. The inclination of the ordinary American mind, in seasons of festivity, is toward a too much indulgence in exhilirating stimulants, and while the ladies who dispensed the sweet, weak wine in small doses did not wisely consider that a number of such doses, supplemented by the friendly tips of something stronger at the bar, had a bewildering effect on the legs tongue, and general deportment of the young gentlemen who bonored their "open houses" n New Year's day.

So generally had intoxication followe New Year's calling, that the newspaper never failed to point a comicality on he young man who went forth to call arrayed in the best of style in the morning but returns home in a patrol wagon or o the conventional shutter, at eventide,

It has come to pass also, that New Year alls fail to provide a clock for booziness, and the boose gone the real back-bone of pleas ng custom is shattered beyond recall.

Now it is almost as much as a youn man's reputation is worth to sally forth o New Year's day in his calling attire, button hole boquet and other festive paraphernalic because it is so generally understood that he will be drunk before night, or ought to be that the errand boy, hopeful of the prospec tive fee, follows him at a respectable di tance with a cooling board.

Another cause for this extinction is that costs too much to keep a high-toned, free lunch house even for one day in the year and hence many have abandoned it. The again a fellow can send a highly ornamental card to his lady friend, and get roaring drunk at the club or saloon, with the boys, in his business suit. So it appear that the hilarity of the occasion is removed from the parlors on the fashionable avenue to the club-rooms or gilded apartments of public resort, and the proceeds of the occasion go directly to the venders of the festive gin cock-tail.

There is no reason, however, why th genial good cheer, the sweet cider and gin r-bread bospitality of New Year's day should not mark the advent of a new year i the calendar of our lives, or that its hopeful cheerfulness and good will should not extend to every day in the full round year.

The great mass of steel is being raised to the heat necessary for rolling in a furnace in the immense ouilding devoted at Landore to rolling and hammering purposes. At the proper moment the furnace is opened and the luminous mass is dragged from its burning bed onto a light, but suffi-ciently strong, truck, and pushed quick-ly toward the rolling-mills. An ingot "bloom" of the great weight speci fied is not easy to move, and it is amus ing to see the skill with which it is dealt with. Wheeled at a white heat up to the "rolls," the mass is at first as it were reluctantly accepted, and passes into their jaws with some difficulty Then it becomes by degrees flatter and flatter until it seems that it may become a plate. Backward and forward, spurtng out flames as the jaws of the rolling mill close upon it, the great mass of incandescent steel is kneaded as if it were dough, and flattened out to the reuired size. As the fiery sheet pours ut of the rolls boys run beside brooms soaked in water to wash off the oxidized skin of the metal, and thus leave a clean surface. While this is gong on at one set of rolls, others are turning out plates and girders, angles and rods, and the iron floor on which we stand becomes so hot that we are

and closed up by paying back to its share holders the par of its stock and one hundred er cent, premium. The Mad River National Bank of Springfield has also been quite prosperous, and upon inquiry made at correct sources we have ob-

prosperous career. It never passed a dividend

tained the following information: At the present time the bank has a capital of \$300,000, and a surplus fund of \$83,355,56. and commences its extended life in a good condition. During the past twenty years its earnings have reached the sum of \$629,996.92. and it has paid over to the stockholders in

dividends the sum of \$546,641.36. From the foregoing statement of facts we are authorized to make the following conlusion: that the management of the bank to entitled to some credit for its success, and the city of Springfield must have been, all the time, in a strong business position to have so well sustained, not only this bank, but four Georgia General walked in and sat other National Banks.

Custer and Young.

There is a good one told by General Pierce Young, which we print in cor-rected shape. Custer and Young were essmates and classmates, and devo ed friends at West Point. In the war they were Major Generals of cavalry on opposing sides. One day General Young was invited to breakfast at the tiful young ladies had prepared a smoking breakfast, to which the General was addressing himself with ardor, when a shell burst through the house. Glancing through the window he saw Custer charging toward the house at the head of his staff. Out the window Young went, calling to the young la dies: "Tell Custer I leave the break Custer enjoyed it heart ast for him." ily, and looked forward with pleasure to the dinner in the distance. In the meantime Young, smarting over the loss of his breakfast and his hasty re treat, drove the Federal line back, and ov dinner time was in sight of the Hunter mansion again. Custer, who was just setting down to dinner, laughed and said: "That's Pierce Young coming back. I knew he wouldn't leave me ere in peace. Here's my pictureate leaves his love with this excellent dinner." And out of the window he went and away like a flash, while the down to dinner .- Atlanta Constitution.

Ammoniated Bread

Ammoniated baking powders-that is, baking powders in which carbonate of amnonia is used as an ingredient, and which exhale an odor of ammonia when heated-are classed by many eminent physicians and sanitarians as superior to all others. Profes-sor Hassell, of London, who is recognized as highest authority on the subject of bygiene, commends in the strongest terms use of carbonate of ammonia as a leavening agent, staving its great advantage to be in its perfect volatility, which permits it to be, by the heat of baking, entirely thrown into leavening gas whereby the bread is raised. The experiment with heat would seem to indicate the superior, not the inferior, value of such baking powder. The little heat that is imparted to it when held over a gas jet, lamp, or stove, suffices to resolve the carbonate of ammonia into leavening gas and throw it off. The first heat of baking, therefore, will effectually develop all the gas, thoroughly leaven the loat, and dissipate the gas-producing ingredients of a powder of this kind; and this is the highest test of a perfect baking powder. Where other alkalies slone are used they are not infrequently retained, unresolved, through the whole process of baking, and remain an unwholesome ingredient in the finished bread. The carbonate of ammonia cannot be used as substitute for cream of tartar,-N. Y. Weekly Tritune.
